Summary

Results-driven Full Stack Developer with over 3 years of experience designing scalable web architectures, automating onboarding processes, and integrating complex financial APIs. Proficient in Laravel, PHP, MySQL, and PostgreSQL. Proven ability to build high-performance backend systems and RESTful APIs within Agile/Scrum environments.

Technical Skills

Languages: HTML, CSS, JavaScript, TypeScript
Back-End: Laravel, PHP, AJAX, JSON, Java
Databases: SQL, PostgreSQL, MySQL
Tools: Git, GitHub, Jira, Bitbucket, RESTful API, Third-Party API, Postman, Swagger

Work Experience

Software Engineer Aug 2023 – Present
Cloudrevel Innovations, Chennai

- Developed and maintained web applications using PHP, Laravel, and relational databases, following coding standards and best practices.
- Designed and integrated RESTful APIs to connect frontend applications with backend services and ensure smooth data communication.
- Optimized SQL queries, performed unit testing, fixed bugs, and troubleshot application issues to improve performance and reliability.
- Used Git for version control and worked with AWS and CI/CD pipelines to support code management, deployment, and application maintenance.
- Collaborated with cross-functional teams in an Agile environment, participated in project discussions, and completed assigned tasks within deadlines.

Projects

RUGR – Banking Project | PHP, Laravel, PostgreSQL
- Implemented transaction management and report-generation features and integrated third-party APIs to support frontend developers.

Finance Management System | PHP, Laravel, MySQL
- Built a finance management module to manage expenses, purchases, sales, and billing operations with structured database management and transaction tracking.

HRMS – Human Resource Management System | PHP, Laravel, MySQL, Blade, Ajax, JavaScript
- Developed an HR management system with attendance tracking, leave management, role-based authentication, and separate admin and superadmin panels.

Let's Dine – Restaurant Seat Reservation System | PHP, Laravel, PostgreSQL, Blade, Ajax, JavaScript
- Created a restaurant reservation application with dynamic booking functionality and a user-friendly interface for managing table reservations.

SDBMS – Student Database Management System | Core Java, JDBC, MySQL
- Developed a student management system using object-oriented programming (OOP), CRUD operations, and sorting and filtering features to manage student records efficiently.

Education

Bachelor of Engineering (B.E.) – Mechanical Engineering 2018 - 2022, *Mahendra Engineering College, CGPA: 8.1*
Higher Secondary Certificate (HSC), 2018, *Tagore Mat Hr Sec School, Percentage: 64%*
Secondary School Leaving Certificate (SSLC), 2016, *Tagore Mat Hr Sec School, Percentage: 78%*
